Certificate of testing

Certificate

Project ID: CMX-1

Project: Coinmixed.eu website test

Auditor: Rajmond Ványi Certified Ethical Hacker, Offensive Security Certified Professional
CEH Certificate ID: ECC 95896121484
OSCP Certificate ID: OS-101-05570

The auditor certifies that the Web Security Audit based on the Open Web Application Security Project (OWASP) complied with the requirements of the online crypto services system of Mixed Trade Ltd at <https://coinmixed.eu>.

The tests were conducted from black-box and gray-box perspective to determine whether the site was protected against both external and internal attacks on the following topics:

- vulnerabilities, attacks and errors, collecting information, configuration testing, user authentication, authentication and authorization tests, session and session management, malicious manipulation of user input data, error handling, cryptography
- Cross-Site Scripting Attacks both Persistent and Reflected XSS, Cross-Site Request Forgery (CSRF), Incorrect or Incomplete Use of Security Solutions, Breaking Passwords, Capturing Sensitive Clients and System Data, Unauthorized Access through Victims
- Client-side and web solutions security, user and password management in JavaScript, JavaScript obfuscation and code recovery, stealing history, ClickJacking, Ajax security. The security of the used API, unauthorized access and operation, secure communication and channel-level security (TLS / SSL)
- SQL injection, database, and system information leakage by forcing web services to show different information

Various testing tools and methodologies were used during the audit, also the list of test criteria are not exhaustive.

The certificate is valid from 22 January 2019 until 21 January 2020.

Date of issue: 22 January 2019
